HOW it works!
1901 Group's Asset Management as-a-Service saves customers valuable time and resources using the following three-pronged approach:

1 Network Inventory
Real time detailed inventory of all devices on the entire network no matter the OS; Windows, Linux, Mac, Vmware, Hyper-V, Routers, Switches, Printers, etc.

2 Asset Tracking, Reporting, and Alerts
On demand or automated reporting of all assets (Hardware, Applications, OS) on the network. Continuous available status of hardware health, warranty, SLA information and more. Integrated API's to vendor sites for accurate SLA data.

3 Active Directory Integration
Associates user to computer and assists with employee management.
