1901 Group — A Leidos Company
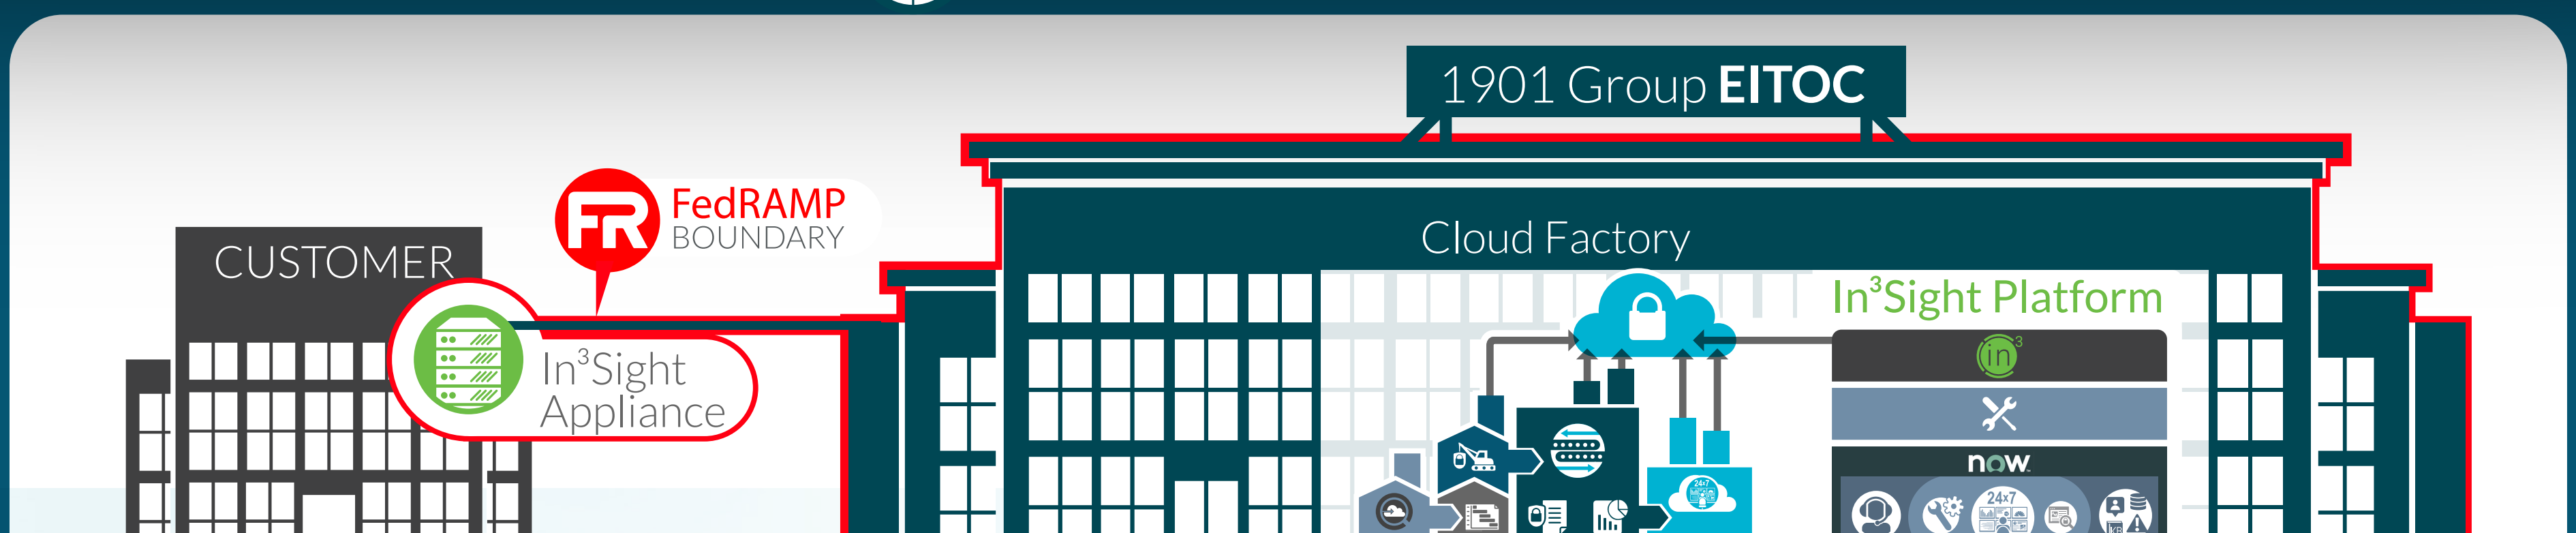

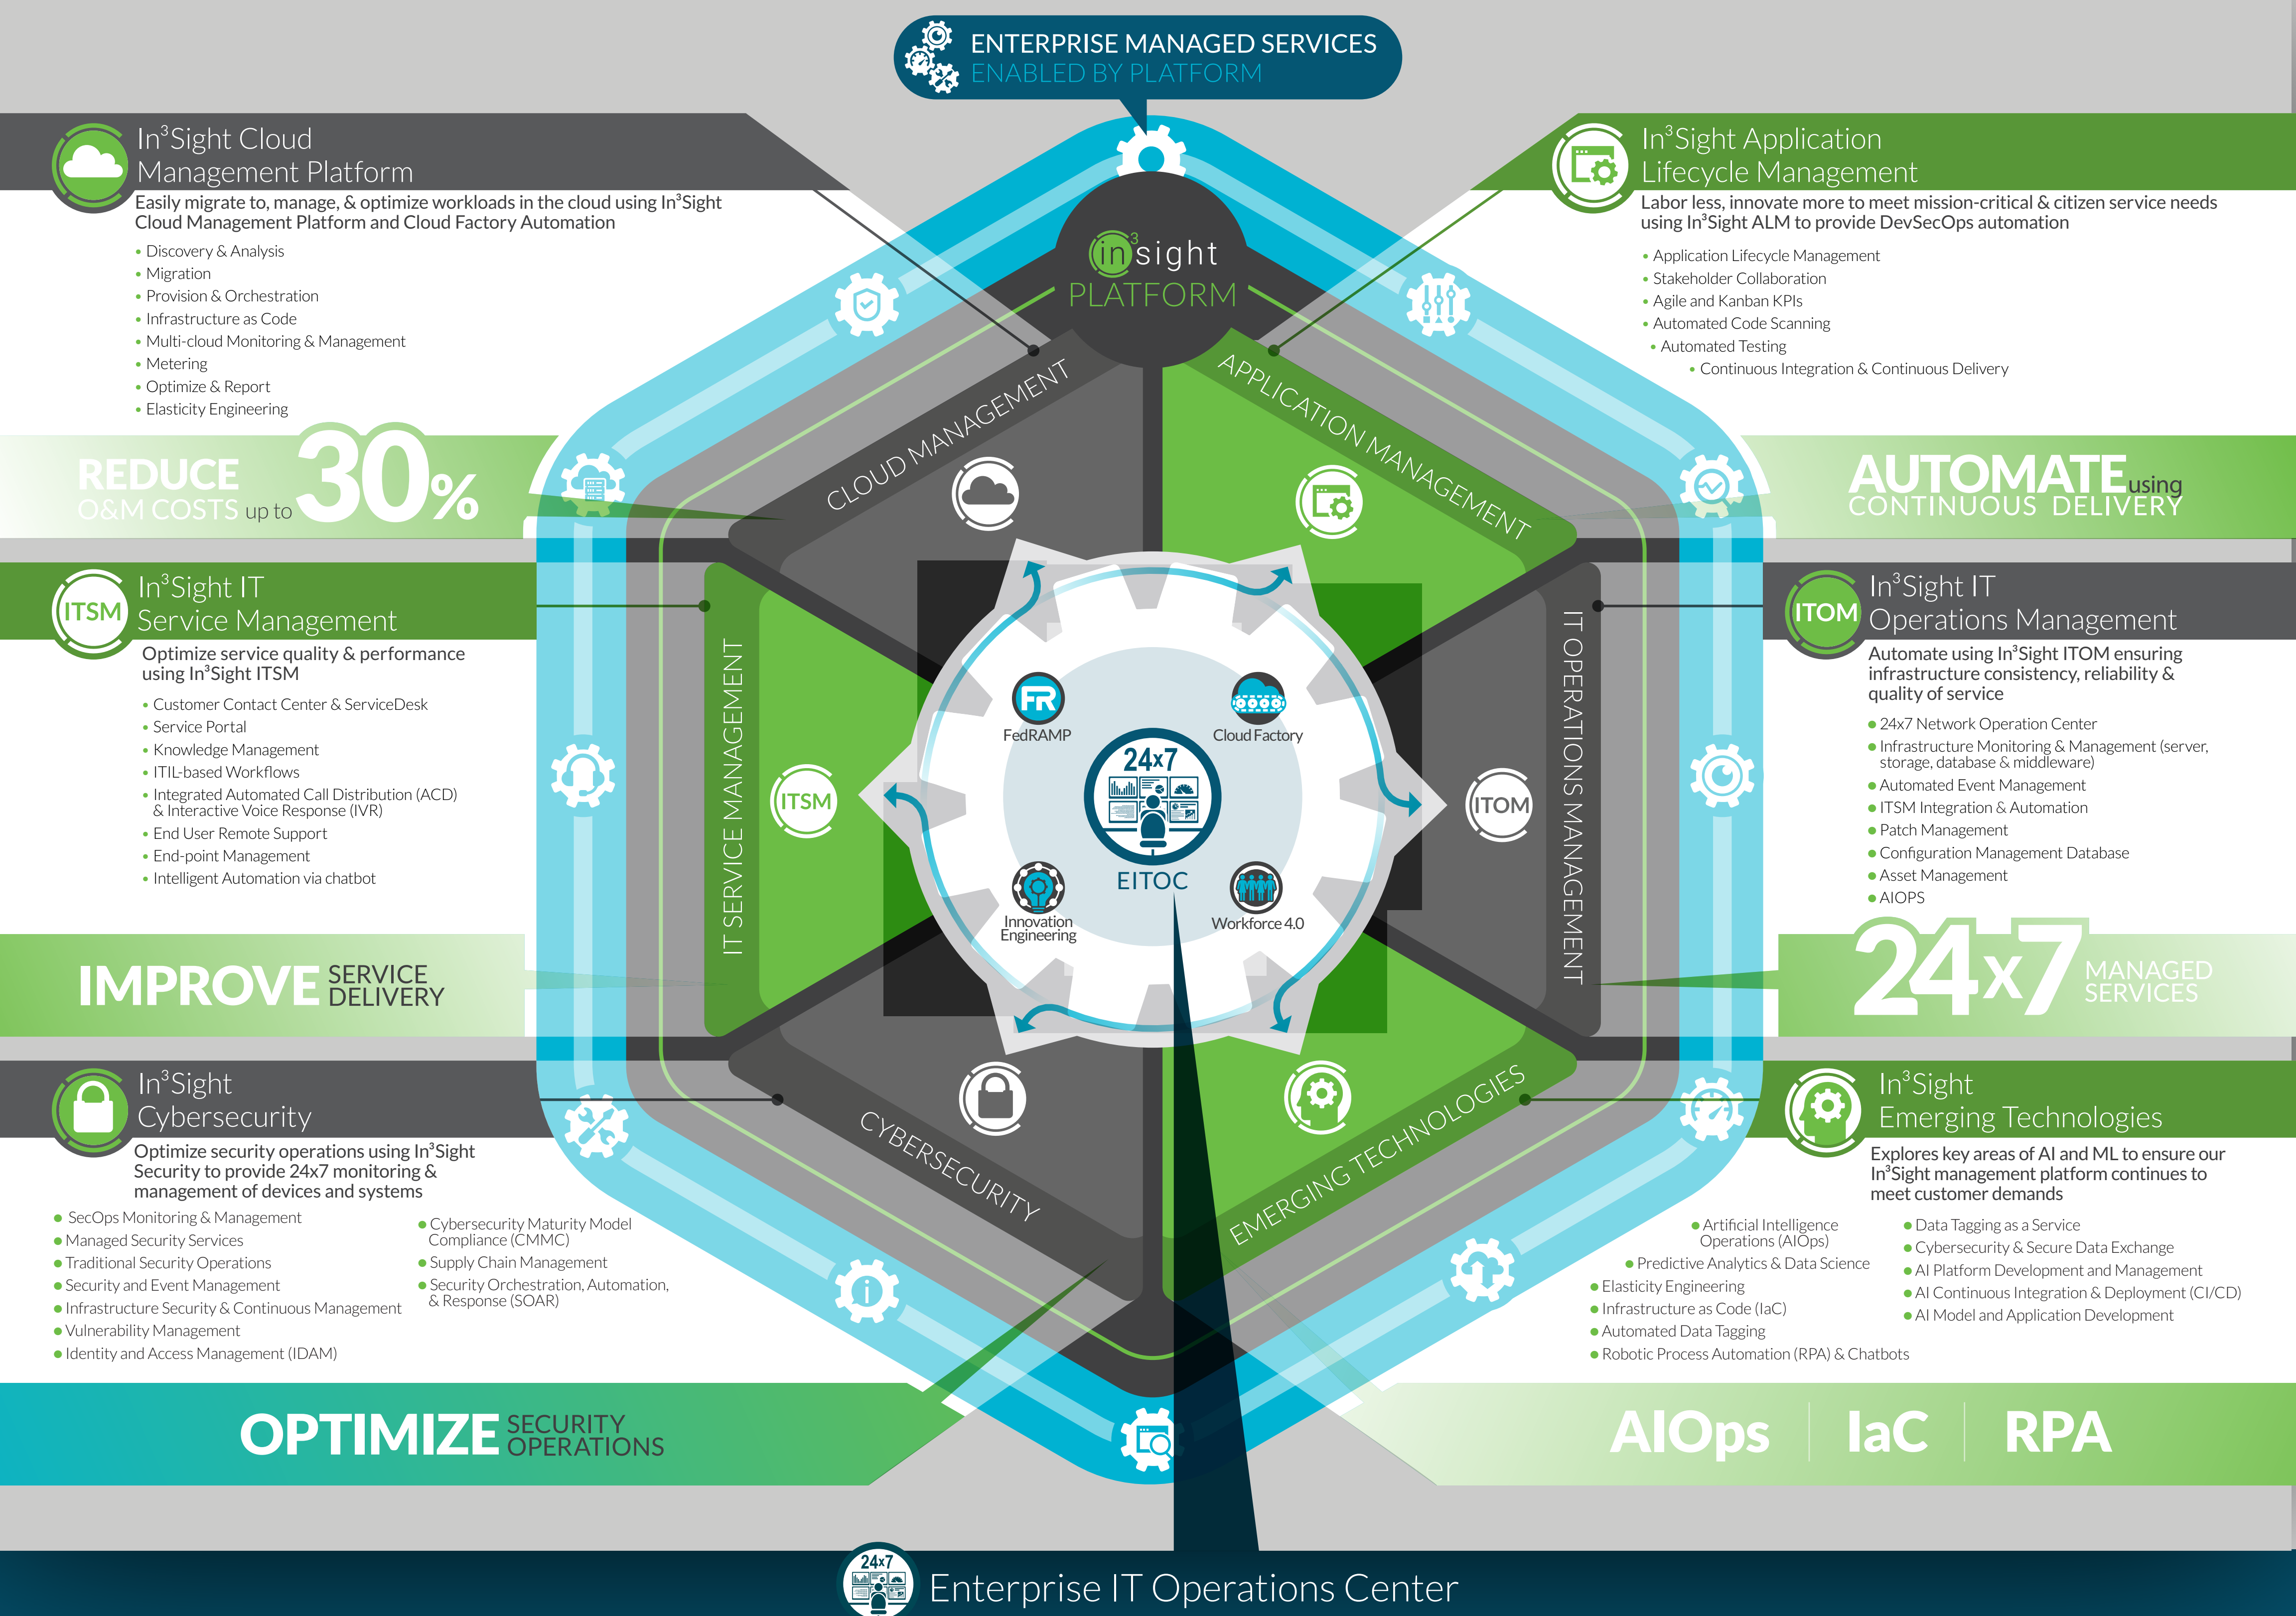

Better IT Outcomes for Government

in³sight™ MANAGEMENT PLATFORM

In³Sight is 1901 Group's one-of-a-kind FedRAMP-authorized management platform used to deliver managed services. In³Sight is a SaaS solution to monitor, manage, and optimize IT as a service across government data centers and multi-cloud through a single pane of glass. In³Sight includes integrated tools for cloud management platform (CMP), application lifecycle management (ALM), IT service management (ITSM), IT operations management (ITOM), and cybersecurity. Scalable, repeatable, and affordable, In³Sight leverages artificial intelligence and machine learning to provide a proactive AIOps solution to help drive mission success.

In³Sight's goal is to accelerate agency IT modernization by "**unifying and automating**" to **transform IT operations, reduce costs, and improve service levels.**

ENTERPRISE MANAGED SERVICES ENABLED BY PLATFORM

In³Sight Cloud Management Platform
Easily migrate to, manage, & optimize workloads in the cloud using In³Sight Cloud Management Platform and Cloud Factory Automation
- Discovery & Analysis
- Migration
- Provision & Orchestration
- Infrastructure as Code
- Multi-cloud Monitoring & Management
- Metering
- Optimize & Report
- Elasticity Engineering

REDUCE O&M COSTS up to 30%

In³Sight IT Service Management
Optimize service quality & performance using In³Sight ITSM
- Customer Contact Center & ServiceDesk
- Service Portal
- Knowledge Management
- ITIL-based Workflows
- Integrated Automated Call Distribution (ACD) & Interactive Voice Response (IVR)
- End User Remote Support
- End-point Management
- Intelligent Automation via chatbot

IMPROVE SERVICE DELIVERY

In³Sight Cybersecurity
Optimize security operations using In³Sight Security to provide 24x7 monitoring & management of devices and systems
- SecOps Monitoring & Management
- Managed Security Services
- Traditional Security Operations
- Security and Event Management
- Infrastructure Security & Continuous Management
- Vulnerability Management
- Identity and Access Management (IDAM)
- Cybersecurity Maturity Model Compliance (CMMC)
- Supply Chain Management
- Security Orchestration, Automation, & Response (SOAR)

OPTIMIZE SECURITY OPERATIONS

In³Sight Application Lifecycle Management
Labor less, innovate more to meet mission-critical & citizen service needs using In³Sight ALM to provide DevSecOps automation
- Application Lifecycle Management
- Stakeholder Collaboration
- Agile and Kanban KPIs
- Automated Code Scanning
- Automated Testing
- Continuous Integration & Continuous Delivery

AUTOMATE using CONTINUOUS DELIVERY

In³Sight IT Operations Management
Automate using In³Sight ITOM ensuring infrastructure consistency, reliability & quality of service
- 24x7 Network Operation Center
- Infrastructure Monitoring & Management (server, storage, database & middleware)
- Automated Event Management
- ITSM Integration & Automation
- Patch Management
- Configuration Management Database
- Asset Management
- AIOPS

24x7 MANAGED SERVICES

In³Sight Emerging Technologies
Explores key areas of AI and ML to ensure our In³Sight management platform continues to meet customer demands
- Artificial Intelligence Operations (AIOps)
- Predictive Analytics & Data Science
- Elasticity Engineering
- Infrastructure as Code (IaC)
- Automated Data Tagging
- Robotic Process Automation (RPA) & Chatbots
- Data Tagging as a Service
- Cybersecurity & Secure Data Exchange
- AI Platform Development and Management
- AI Continuous Integration & Deployment (CI/CD)
- AI Model and Application Development
