

INFOGRAPHIC SERIES

PROCESS AUTOMATION

PROCESS AUTOMATION is the ability to orchestrate and integrate tools, people and processes through workflow.

1901 Group's Process Automation solutions effectively and substantially reduce human error and streamline allocation of resources; thereby, lowering customer costs, increasing productivity, and providing absolute priority to mission-critical systems.

Reduce Human Error

Prioritize Resources

Lower Costs

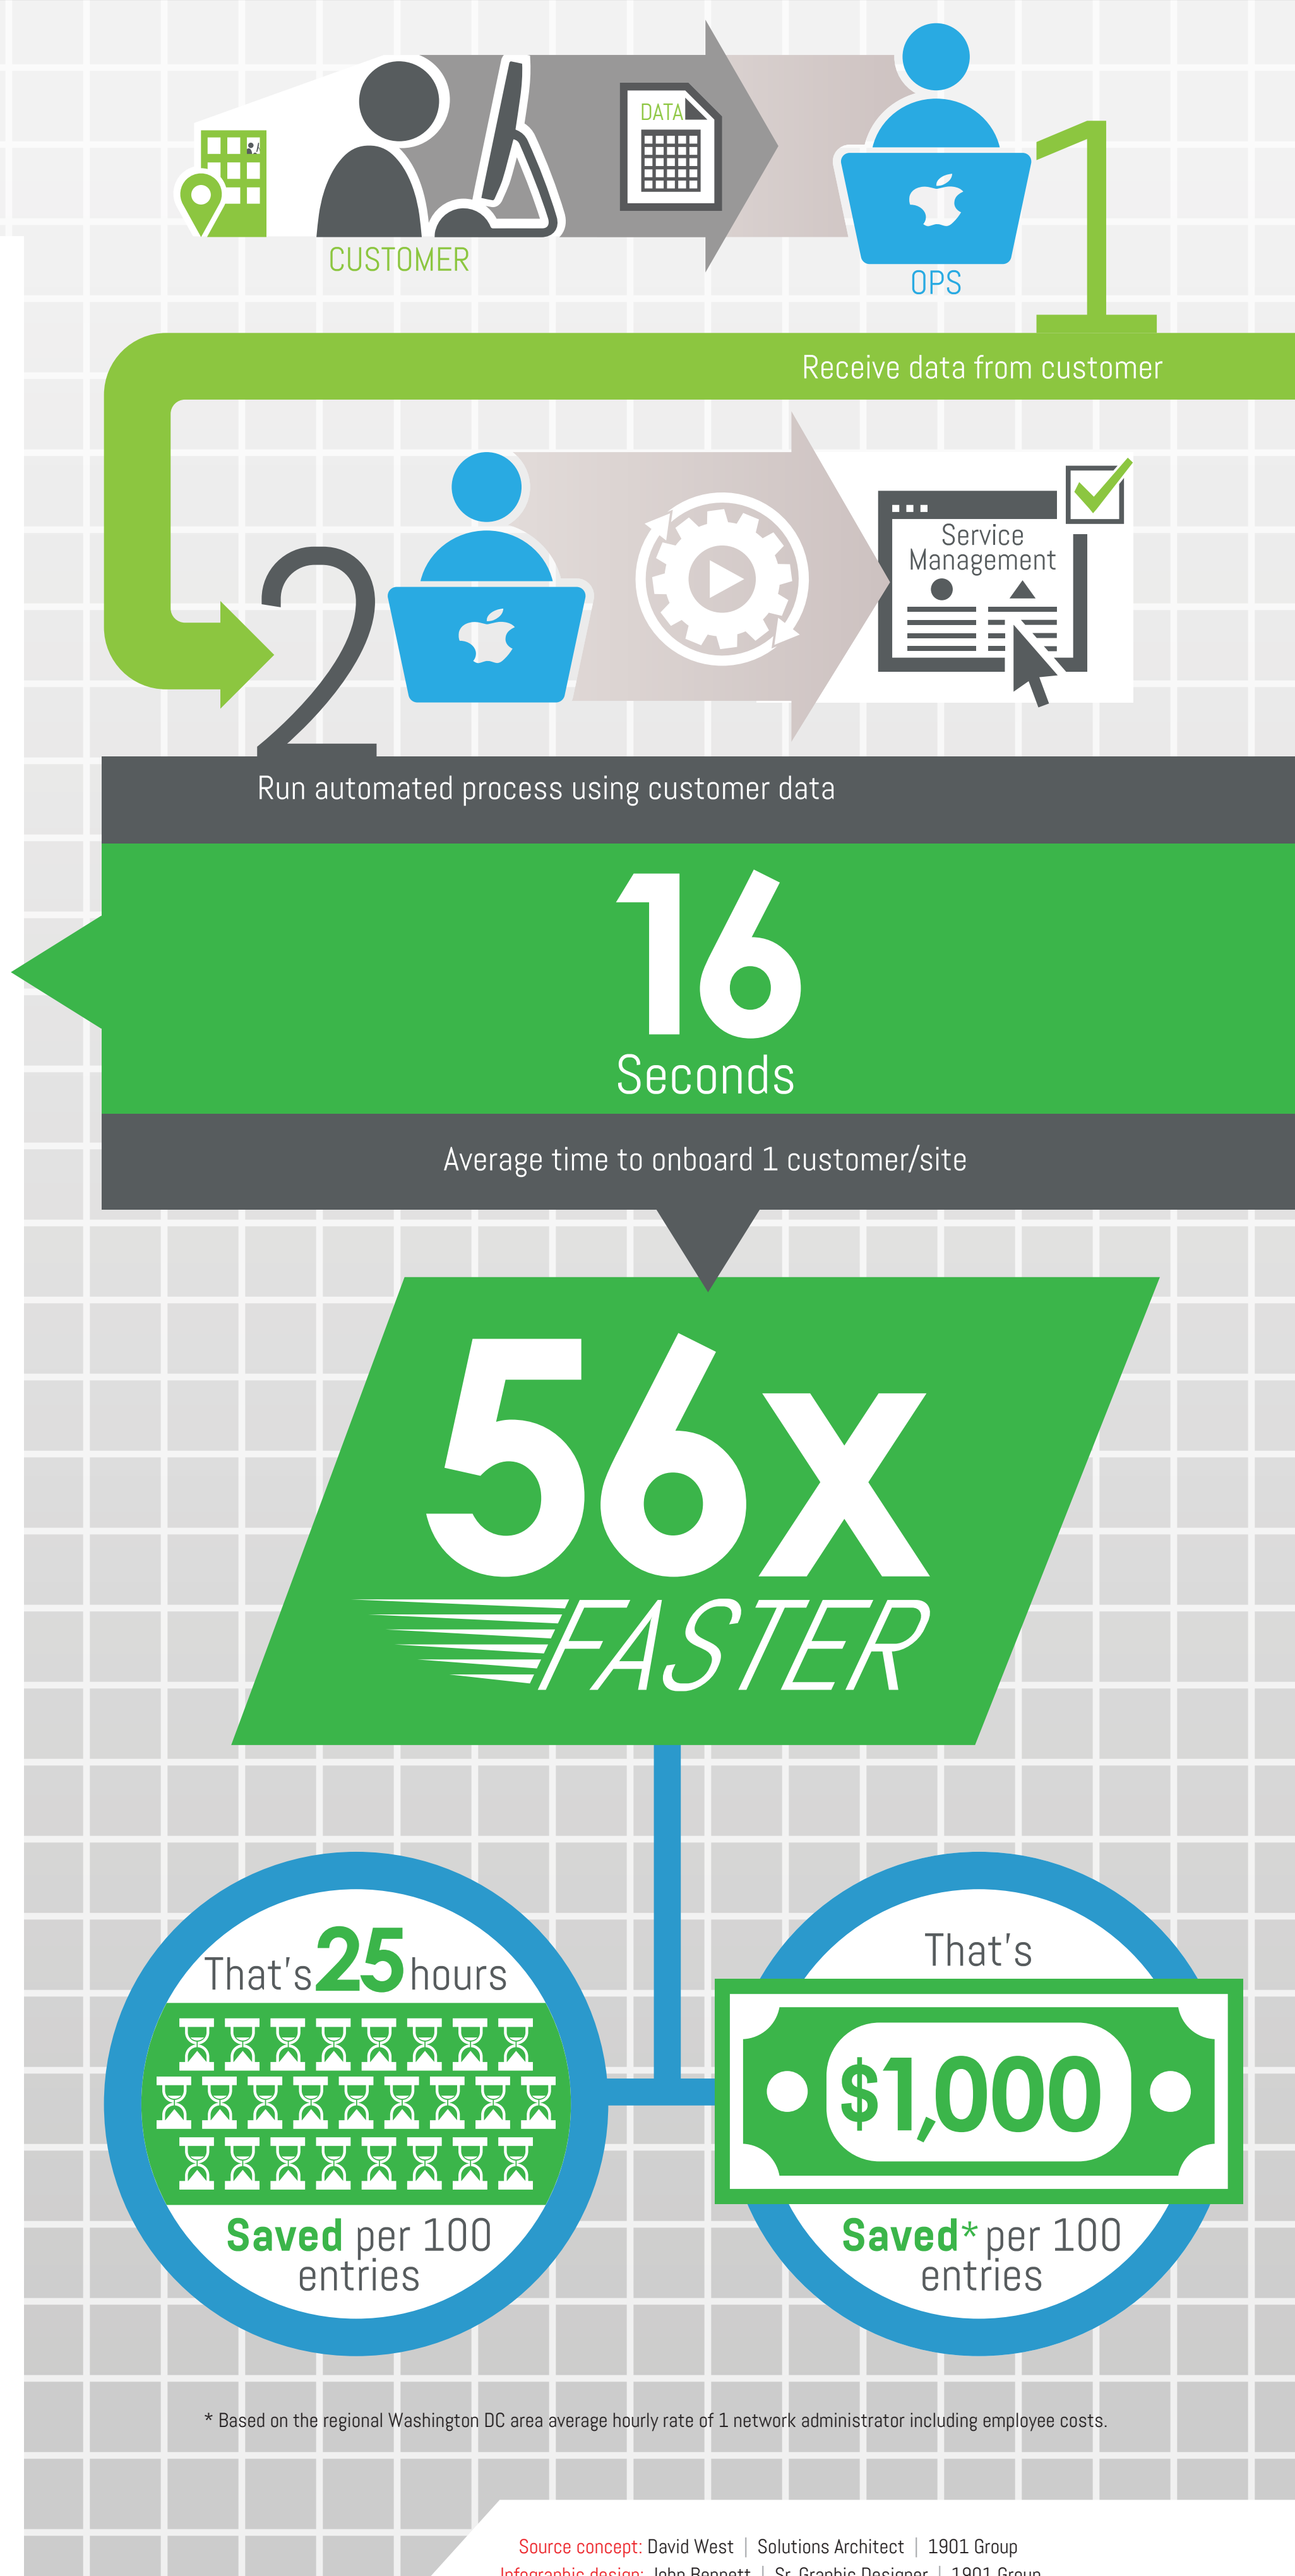

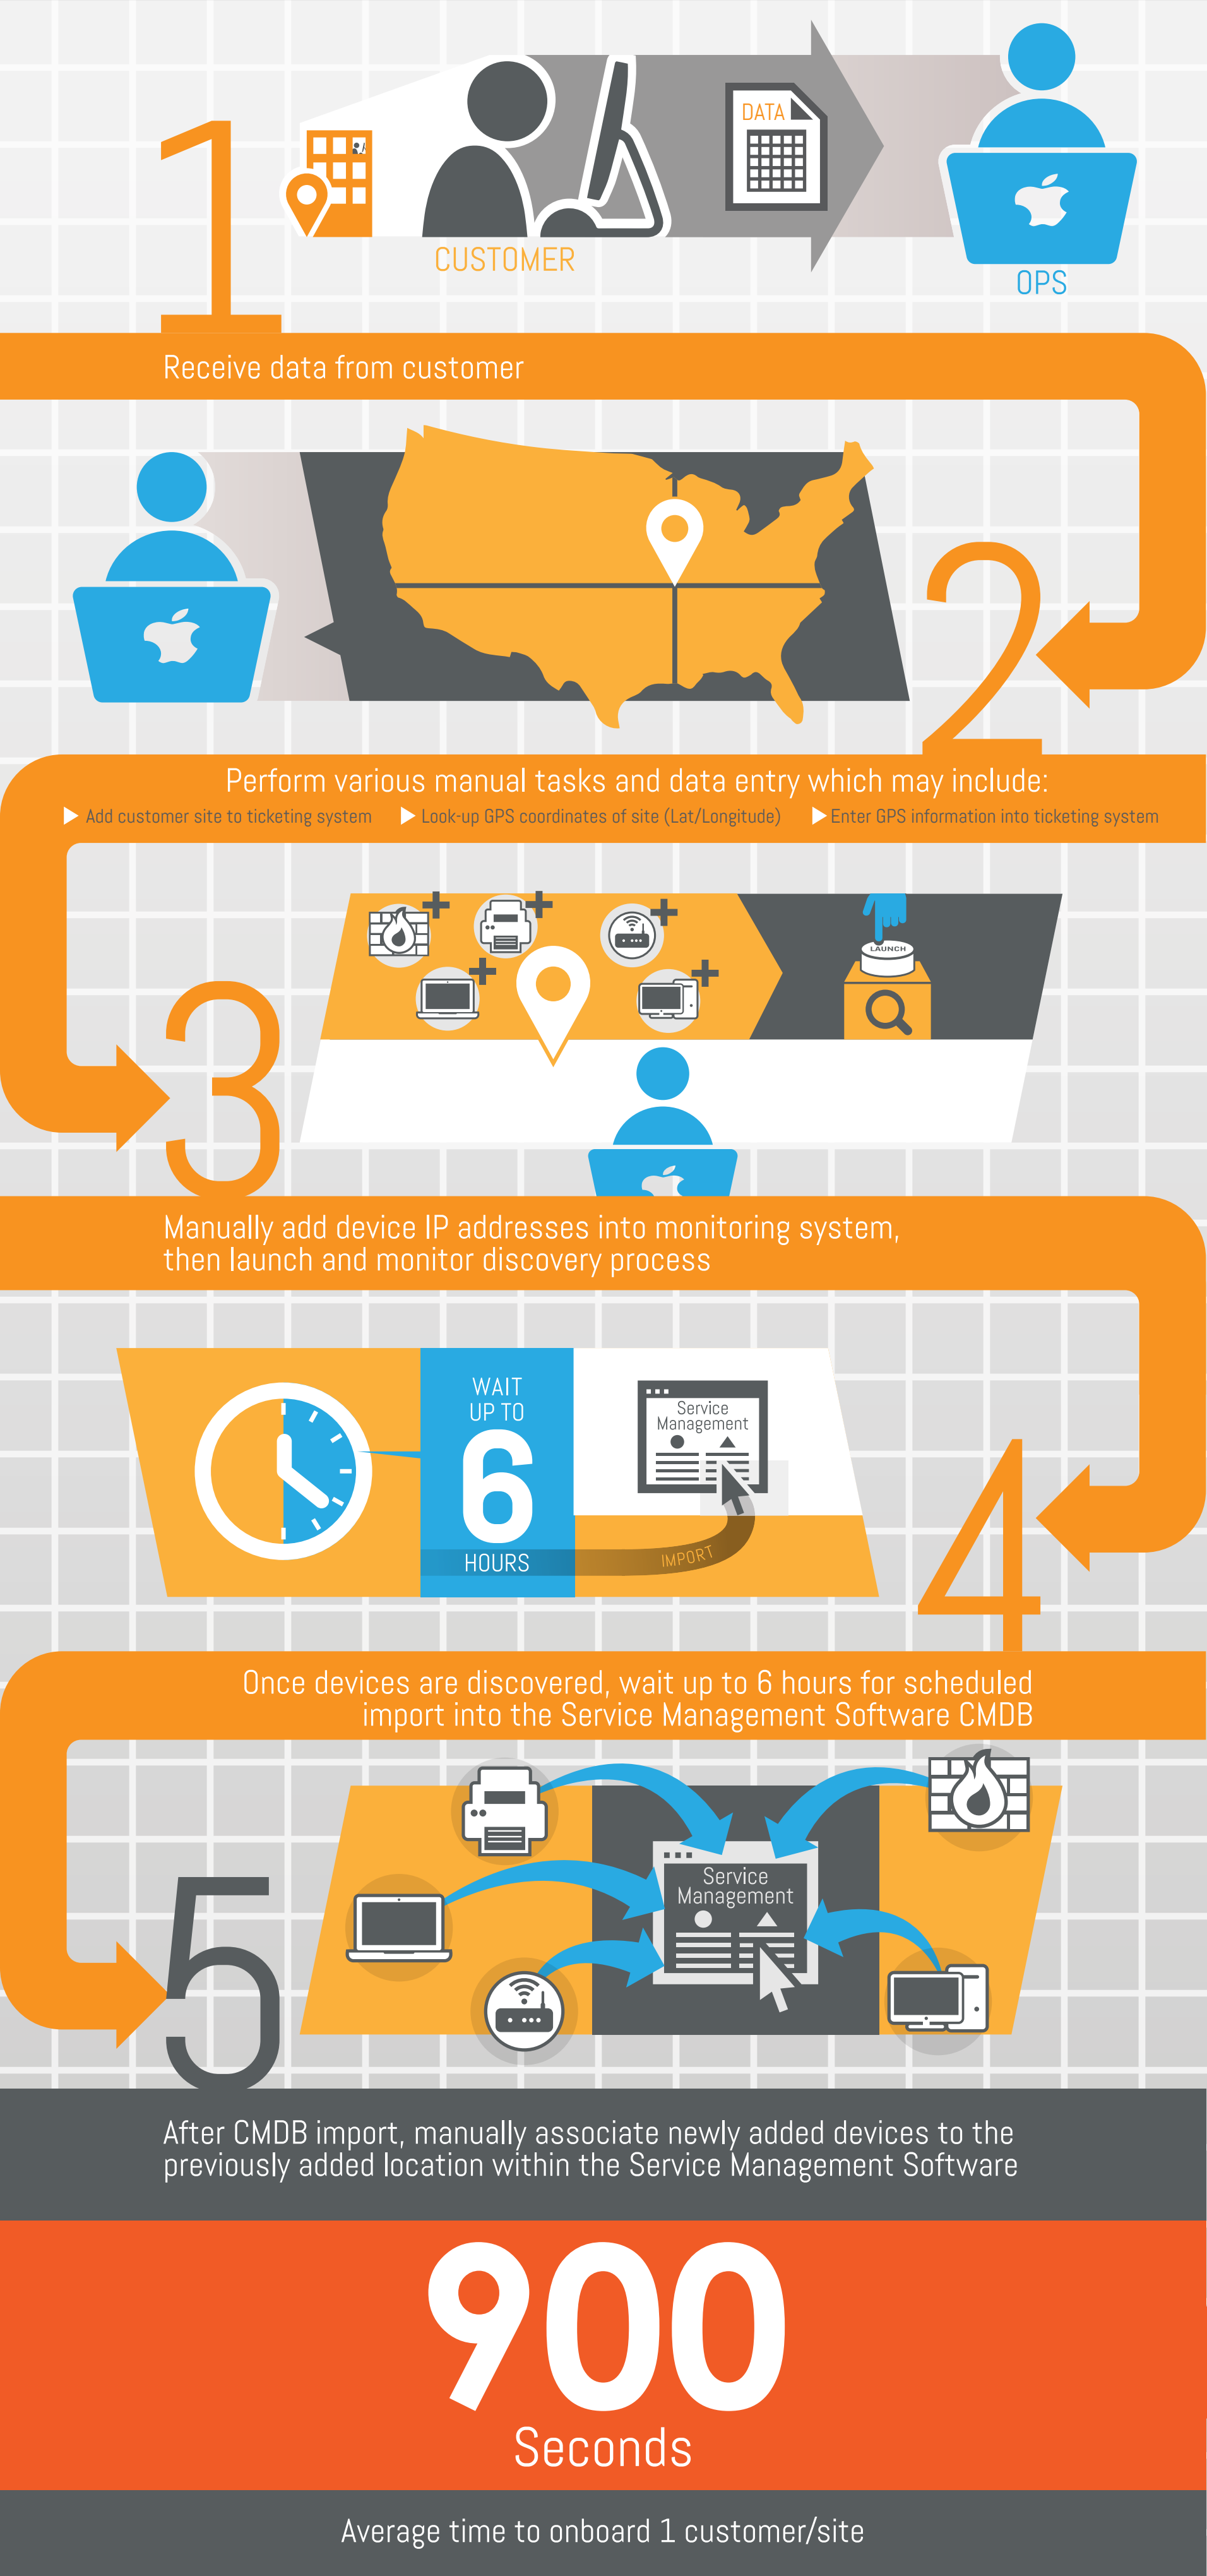

Increase Productivity

The following comparison illustrates the benefits of Process Automation. "Before" represents an older process of manually onboarding new users/locations into a customer's Service Management system. "After" represents 1901 Group's deployed Automated Process, and shows how our approach improves and optimizes the customer's onboarding process.

BEFORE

AFTER

* Based on the regional Washington DC area average hourly rate of 1 network administrator including employee costs.
